EU DECLARATION OF CONFORMITY FOR POLYWARM COATED CALORIFIER WITH FIXED HEAT EXCHANGER: BOLLY ST-AP-XL

The underwriter Cordivari SRL hereby declares that the aforementioned Bolly models are manufactured in accordance with directive 2014/68 EU and as established with art. n. 4.3 of this directive they do not have to be CE marked.

In conformity with directive 2014/68 EU (PED), and with regulations N. 812/2013 and N. 814/2013 derived from directive 2009/125/CE (ErP- ecodesign requirements), and directive 2010/30/CE (energy labelling), the technical data, the heat loss and the energetic class are indicated on the label attached to the product. This label has to be intended as integral part of the instruction of use.

The tanks are manufactured in mild steel S 235 JR G2 UNI EN 10025 and are equipped with one or two fix coils suitable to work with hot water at 12 bar pressure and at a maximum temperature of 110 °C.

The tanks are internally coated with Polywarm, epoxy-polyester powder suitable for drinkable water.

The tanks are suitable to work at maximum temperature up to 90°C and they are subject to Hydraulic Proof Test at 1.22 times the max working pressure, which is 10 bar for capacities from 150 to 800 lt, and 8 bar for capacities from 1000 to 1500 lt.

The insulation is made in rigid high density expanded polyurethane for capacities from 150 to 1500 lt, and it is also available in polyester fleece for capacities from 800 to 1500 lt.

The external lining is in PVC.

For all other technical details we kindly suggest to consult our current catalogue.
